MarginOS spec v18 — FINAL changes from v17.1

Approved by Akthar Uddin, 5 November 2026 at 14:18 Europe/Madrid. FINAL handoff to Design, Development, QA and Marketing.

> **Working name:** MarginOS cannot be launched under this name (K37). **MarginSeam is a candidate pending trademark clearance, not an approved name.** Use one `PRODUCT_NAME` config value everywhere; domain/email and brand assets are configurable for the approved post-clearance swap.

Final decisions at 14:18

- **K38 — 14-day free trial on every tier, monthly or annual.** Card required through Stripe Checkout/Managed Payments. Selected-tier features and order limit apply. Automatic charge on day 15 unless cancelled. Cancel any time in Plan & billing/Stripe portal with no charge. Pricing and Checkout state trial length, post-trial price, charge date and cancellation route. Samples stay. K38 replaces K35.
- **K39 — deletion when subscription access ends.** Paid/trial cancellation warns on screen and by email that all product data will be deleted on an exact date, with Download my data. At access end all product/user data is wiped; backups clear within 7 days. Login may remain for fresh resubscription; no old data returns. Final failed payment or immediate first-payment refund triggers deletion at access end. K39 replaces 12-month lapsed retention and 60/30-day warnings.
- **K40 — FINAL approval.** Approved draft content is final except OD/Q items. The spec's short front table supplies non-approved recommended defaults behind config so implementation can proceed.

Commercial model

Area	v17.1	FINAL v18
Plans	Free plus lifetime Pro	No permanent Free plan. Starter £39, Growth £79 “Most popular”, Pro £129, Scale £199 monthly, VAT included
Annual	None	£390 / £790 / £1,290 / £1,990; usage resets monthly inside annual access
Trial	None	14 days free on every tier; card required; automatic monthly/annual charge day 15 unless cancelled
Founding offer	£39/£59 lifetime; first	First 100 successfully paying accounts receive 25% off monthly for 12 months: £29.25 / £59.25 / £96.75 / £149.25. Trial sign-up is not a

Area	v17.1	FINAL v18
	200	paying account; successful conversion is
Existing lifetime	One-time entitlement	Honour valid licences; no forced recurring billing. Refunded/lost-dispute licences remain invalid. Mapping default is closest Pro-level capability (Q28, not approved)
Order allowance	“No monthly order caps”	Hard unique-order limits 500 / 2,000 / 5,000 / 15,000 per billing month, including trials
Local prices	Fixed lifetime amounts	GBP approved; non-GBP fixed amounts undecided. Recommended default is GBP checkout only

Annual billing supersedes the monthly-only research recommendation. Earlier £20-only and £12/£20/£35/£60 proposals are superseded. The recommended default is monthly-only founding eligibility behind config (Q26), not an approval.

Trial requirements and defaults

- One trial per account is approved. One per payment card where Stripe permits is a **recommended default**, without retaining full card/CVC data.
- A pre-trial-end reminder is required. **Recommended default: 3 days before**, configurable; legal confirms UK 2027 wording/timing.
- **Recommended default:** trial cancellation preserves access/export to original trial end, then deletes. Immediate deletion mode may exist behind config but cannot contradict disclosed dates.
- Successful conversion is the first payment for the existing 14-day full-refund rule and founding counter. Legal must decide whether that refund window still applies after trial conversion (OD7).
- Late/replayed webhooks cannot charge a timely cancelled trial or resurrect deleted data.

Hard order limits

Canonical unique orders count once per monthly usage period across files and repeated rows. Annual subscriptions still reset monthly; trials use the selected tier's cap. At 80%, show an in-app notice and send one email naming the next plan.

`projected = |U ∪ N|`; `new_unique = |N|`; `overage = max(0, projected − L)`. Import only when `projected ≤ L`. Otherwise block the whole upload with no inserted, updated or deleted rows. Show new unique, projected, overage and Upgrade. Confirmed prorated upgrades apply immediately without resetting usage; the user re-uploads because the raw blocked file was deleted. Existing results remain while entitlement exists.

Scale account-wide aggregation is the recommended default behind config, not an approval (Q23).

Features and imports

Feature	Starter	Growth	Pro	Scale
Shops / platforms	1 / 1 of 4	1 / up to 2 of 4	1 / all 4	Up to 3 / all 4
History	3 months	12 months	24 months	All history, fair use
Overheads, per-channel ROAS, own FX/conversion	—	Yes	Yes	Yes
Tax	Simple UK/UK VAT	Full per-order	Full	Full
Scenarios	—	2 saved; unlimited comparisons	Unlimited saved	Unlimited saved
PDF beside results	—	Yes	Yes	Yes
Seats	1	1	2	5
Support target	2 working days	1 working day	Priority	Priority + onboarding

All tiers include true profit, Health Score/confidence, verdicts, six leaks with £ impact, ranked fixes, target prices, calculators, Show the maths, sample data, CSV export and **TikTok Shop UK — Beta**. TikTok XLSX uses public UK documentation, actual fees where supplied, 9% VAT-inclusive commission preset or evidenced 5%, separate creator commission, reconciliation, estimates/lower confidence and safe feedback. No real TikTok file has been supplied; real fixtures are required before Beta exit.

Accounts, UX and website

Google-first plus email sign-in; existing password + verification remains unless passwordless OD8 is later approved. Light-only UI; no dark toggle or header PDF icon. Account closure remains a verified email request completed within 7 days; subscription cancellation is different and may leave login. Settings has Profile & sign-in, Plan & billing, Data & privacy. Public Home, Pricing, Sample report, Sign in, Terms, Refunds & cancellation, Privacy, Contact, Help, DPA/subprocessors and not-found routes are required. Guided sample onboarding, ranked-fix dashboard, contextual upgrades and responsive journeys remain approved.

Cancellation, deletion and privacy

- Paid cancellation: access/export to paid-period end, then wipe.
- Trial cancellation: no charge; recommended default access/export to original trial end, then wipe.
- Final payment failure, immediate first-payment refund or lost dispute: wipe at access end.
- Wipe covers orders/raw files, costs, ads, overheads, returns, settings, datasets, calculations/results/reports, samples, shops/team links and derived caches/indexes/exports.
- Minimal login identity, legally required billing/tax records and privacy-safe deletion tombstones may remain under separately disclosed rules. Full account closure removes login too.
- Backup/replica removal completes within 7 days; restore reapplies tombstones before access. Resubscription starts fresh.
- Privacy, DPA/subprocessors, Help and Refunds & cancellation must describe deletion scope/date, export, backup timing, exceptions and fresh resubscription. No 12-month retention or 60/30-day warning promises remain.

New acceptance coverage

The FINAL spec adds **S17–S26** for every-tier/interval trials, cancellation/no charge, reminder, repeat-trial prevention, disclosures, conversion, late webhooks and trial limits; and **D1–D12** for paid/trial/failure/refund deletion, export warnings, fresh resubscription, backup ageing, restore tombstones, missed jobs, closure distinction, legacy lifetime and privacy wording. Existing L1–L16 and S1–S16 remain with retention expectations updated.

Calculation and review tests

Sections 12.0–12.3 preserve the v17.1 formulas. Obsolete Free/Pro-only labels changed to paid-tier/subscriber terminology; no formula was intentionally changed.

FINAL executed specification-review results are recorded in the handoff and `/workspace/audit/v18-final/`. They are not live application tests. Product QA must run all acceptance tests, real Stripe trial/proration/webhook events, transactional concurrency, annual monthly boundaries, TikTok reconciliation, deletion/backup restore and device journeys.

Contradictions resolved

K38 supersedes no-trial K35; samples remain. K39 supersedes 12-month retention and restore-on-resubscription, not active legacy lifetime data. Hard limits supersede “no caps” and soft-limit advice. Approved platform slots supersede all-platforms-on-every-tier research. Documentation-based TikTok Beta supersedes real-file-first guidance but validation risk remains. Email closure supersedes self-serve deletion. Annual plans retain monthly usage boundaries. Upload/dataset research caps are not approved additional caps.

Not yet decided — defaults are not approvals

See the FINAL spec front table for the full implementation details: OD3/Q29 name/MarginSeam clearance and `PRODUCT_NAME`; OD4 card-fee wording; OD5/Q22–Q23 seats/shops/account-wide Scale aggregation; OD6/Q30 GBP-only default; OD7 legal/accounting and refund-after-trial; OD8 password + verification default; Q10 100 MB/50,000-row configurable upload default; Q11 real-order-only sample clearing; Q25 30-day consented TikTok fixture default/Beta evidence; Q26 monthly-only founding default; Q27 hide out-of-history rows/no destructive migration; Q28 closest-Pro legacy mapping.
