MarginOS Product Spec (Approved)

Business & Product handoff for Design & Development. Approved by Akthar Uddin, 29 October 2026.

1. Product vision

A beautiful, modern web app that shows e-commerce sellers their true profit after all costs (product cost, shipping, ads, platform fees and returns), with a Margin Health Score (0-100) and specific, actionable recommendations.

2. Positioning

"Find where your margin leaks and what each leak costs you. One price, no subscription."

- Competitors (TrueProfit, BeProfit, Lifetimely, Triple Whale) track profit on monthly plans of roughly $29-$219/month, usually priced by order count.
- MarginOS diagnoses instead of just tracking: it ranks margin leaks by £ impact and tells the seller exactly what to fix.
- No subscription and no order caps directly answers the top competitor review complaints (surprise bills, contracts, untrusted numbers).

3. Pricing

- **Free:** £0
- **Pro:** £19 one-time, lifetime access (sold via Lemon Squeezy)
- Live store syncing is excluded from the lifetime deal for now. Data comes in by manual entry or CSV upload.

4. Free vs Pro feature set

Feature	Free	Pro (£19 lifetime)
Data input	Manual entry or one CSV upload	Unlimited CSV uploads and saved datasets
Products analysed	Up to 10	Unlimited
True profit after all costs, incl. returns	Yes	Yes
Margin Health Score (0-100)	Overall score only	Score plus breakdown by cost area and by product
Margin leaks	Top 3, without £ impact	Every leak, ranked by £ impact

Feature	Free	Pro (£19 lifetime)
Recommendations	1 headline action	Specific actions for every leak
Scenario comparison	No	Yes, side-by-side what-ifs
PDF reports	No	Yes, branded and exportable
Saved history	No	Yes, compare month to month

5. Acceptance criteria (Pro)

1. A user can upload a CSV, and profit is calculated after product cost, shipping, ad spend, platform fees and returns.
2. The Health Score shows on a 0-100 scale with a breakdown that explains each part.
3. Every leak shows an estimated £ amount per month and is ranked from largest to smallest.
4. Each leak has at least one specific, actionable recommendation.
5. A user can build at least two scenarios and compare profit and Health Score side by side.
6. A user can export a PDF report with the score, leaks, recommendations and scenarios.
7. Free users see locked Pro items clearly marked, with an upgrade prompt.

6. Out of scope for now

- Live store syncing (Shopify, Amazon, etc.) and automated alerts.
- Any change to pricing, positioning or features requires Akthar's approval.
